ASX ANNOUNCEMENT

Penthrox approved in Mexico

Medical Developments International Limited (ASX: MVP) is delighted to announce it has received regulatory approval for the sale of Penthrox in Mexico. The Mexican Federal Commission for the Protection against Sanitary Risk (“COFEPRIS”) has approved Penthrox for use in patients with moderate to severe Trauma pain **and** for the relief of pain in patients who require analgesia for Surgical Procedures.

Mexico is a country of 127 million people and it is estimated that 37 million patients receive some sort of medical consultation each year. Many of these are treated for trauma and many require analgesia for surgical procedures.

MVP CEO, Mr. John Sharman, said: “We have been waiting on the Mexican authorities to complete the approval process for 2 years. Now that it has arrived we are delighted that we can begin to sell product in Mexico; a key market in Latin America.”

Mr. Sharman, said: “Importantly, Penthrox has been approved for use in moderate to severe pain Trauma cases **and** Surgical procedures requiring analgesia. While it is generally accepted the standard of care for trauma victims in Mexico is not the same as in the developed western world, the market opportunity is large. Our partner, Probiomed, estimate that in time Penthrox could sell 800,000 doses per annum in the Trauma pain hospital setting. The numbers of doses that may be used for Surgical procedures is harder to estimate, but anecdotally it is possible this part of the market could be larger than for Trauma.”
